Symptoms

write the Symptoms

Eye pain

Headache

Muscle pain

Rash

Bone pain

Nausea/vomiti

Solutions-: suggest by doctor.

FeedBack-: Feedback use for patient give output by doctor.

Objective-: The human population is increasing day by day.it will be very dangerous for everyone to visit the doctor and take advice and time will also be wasted.if everyone starts visiting a doctor for a minor disease,what will happen to those patients who are fighting for life and death?

In the coming time ,there will be a lot of struggle here. If we use this application,then the same patient will go to the hospital who is fighting for life and death,and doctors can save life by getting good treatment . through this application you can get both medicine and advice for small diseases ,save your time and someone's life.
